Original export pack path: exports/checkins-review/quarterly-landing-summary-card-final-polish-pack

Reviewer data note: Testing / sandbox data only. Do not use for real private user data review.

Screenshots included:

- 01-quarterly-summary-three-card-layout.png: Quarterly Landing summary section showing the final three-card layout only.
- 02-quarterly-monthly-thread-full-width.png: Monthly thread rendered as a full-width premium row beneath the top two summary cards.
- 03-quarterly-no-carry-forward-summary-tile.png: Proof that the visible Carry-forward summary subtitle has been removed from the landing summary section.
- 04-quarterly-carry-forward-source-context-preserved-if-visible.png: Source context expanded to show that broader continuity/context surfaces remain available after removing only the visible landing Carry-forward tile.
- 05-quarterly-landing-full-proof.png: Full Quarterly Landing proof after the ultra-tight summary-card final polish pass.
- 06-quarterly-review-setup-regression-proof.png: Regression proof that Review/Setup behaviour remains intact after the summary-card-only pass.

Known limitations:

- This was an ultra-tight visible-summary pass only.
- The current sandbox 'Monthly thread' is empty, so the proof demonstrates preserved filtering and empty-state behaviour rather than a populated monthly phrase.
- The regression screenshot captures the Review workspace proof. Setup-open regression was smoke-checked in the same automated run and passed, but was not captured as a separate additional image to keep the pack exactly to the requested file list.
- In the current sandbox state the Monthly thread is empty, so the proof shows the preserved empty state rather than a populated monthly phrase.
- Carry-forward is preserved in data/mappings/search continuity; this screenshot demonstrates preserved context surfaces rather than a dedicated carry-forward landing card.
- This screenshot captures the Review workspace proof; setup-open regression was also smoke-checked in the same run and passed.
